work, do something sensible and stop building air casties, and talking of lovers and honeymoons; it makes me ajek; it's perfectly antimonial. Love is a farce-matrimony is a humbug; husbands are domestic Napoleons, Veroes, Alexanders, sighing for other hearts to con-Neroes, Alexanders, sighing for other hearts to con-quer after they are sure of yours. The honeymoon is as short lived as a lucifer match; after that you may wear your wedding dress at the wash tub, and your night cap to meeting, and your husband wouldn't know it. You may pick up your own pecket handkerchief, help yourself to a chair, and split your gown across the heart reaching over the table to get a peice of butter, back reaching over the table to get a peice of butter, while he is laving in his breakfast as if it was the last meal he should eat in this world; when he gets through he will aid your digestion, (while you are sipping your first cup of coffee) by inquiring what you'll have for diinner, whether the cold lamb was all eat yesterday if the charcoal is out, and what you gave for the last green tea you bought.

Then he gets up from the table lights his cigar with the last evening's paper that you have not had a chance to read; gives two or three whiffs of smoke, sure to give you a headache for the afternoon, and just as his coat tail is vanishing through the door, apologises for not doing "that errrand" for you yesterday—thinks it doubtful if he can to-day—"so pressed with business." Hear of him at 11 o'clock, taking an ice cream with some ladies at Vinton's while you are at home new lining his coat sleeves. Children by the ears all day, can't get out to take the air, seel as crazy as a fly in a drum; husband comes home at sight, nods a "how d'ye do Fan," boxes Charley's ears, stands little Fanny in the corner, puts his feet over the grate, shutting out all the fire, while the baby's little pug-nose grows blue with the cold: reads the newspaper all to himself, solaces his inner man with a hot cup of tea, and just as you are laboring under the hallucination that he will ask you to take a mouthful of fresh air with him, he puts on his dressing gown and slippers, and begins to reckon up the family expenses' after which he lies down on the soin, and you keep time with your needle, while he snores till 9 o'clock.

Next morning ask him to leave you "a little money," he looks at you as if to be sure that you are in your right mind, draws a sigh long enough to inflate a pair of bellowses, and asks you "what you want with it, and if a half dollar wont do." Gracious king! as if those little 100 do Fancy do, shoes, and stockings, could be bought for half a dollar. 200 reams heavy Wro But that's the way with 'em, girls, and you'll find it out when you got husbands."

LIFE OF AN EDITOR .- The editor of a paper published ed at Canton, Ohio, gives the following description of

DISTRESSING ACCIDENT .- A most distressing accident occurred on Tuesday of last week, in this county, about three miles from Dupont, under the following circumstances: A man named Mitchell was chopping off the root of a large tree, when two children-a boy six or seven years old, and a younger daughter-went past to a spring and returned, unobserved by the father, The Greatest Discovery of the Age. NEW BOOK STORE.

WE announce to our friends, to Booksellors, Country Mer chants, Teachers, Professional Gentlemen, and book buyen generally, that we have opened in Indianapolis, Marion county, indiana, a new Book Store. We are prepared at any time to supply the trade, in large or small quantities, with an entire new and fresh atock of Books and Stationery. We keep always on hand a large and complete us ortinent of Miscellaneous, Theological, Law, Medical, Common School, and Classical Books; together with a full stock of Staple and Fancy Stationery.

Pepsin is the chief element, or great digesting principle of the Gastric Juice, the solvent of the Food, the purifying, preserving, and stimulating agent of the stomach and intestines. It is extracted from he digestive stemach of the Ox, thus forming an Artificial Digestive Fluid, precisely like the natural Gastric Juice in its Chemical powhers, and furnishing a complete and perfect substitute for it. By the aid of this preparation, the pains and evis of indigestion and dyspepsin are removed, just as they would be by a healthy stomach. It is doing wonders for Deyspeptic, curing cases of Debaity, Emacistion, Nervous Decline, and Dyspeptic Consumption, supposed to be on the verge of the grave. The scientific evidence upon which is based, is in the highest degree curious and remarkable.

SCIENTIFIC EVIDENCE:

Baron Liebig in his celebrated work on Animal Chemistry, says:

"An Artificial Digestive Fluid analogue to the Gastric Juice in its Chemical powhers, and furnishing a complete and perfect substitute for it. By the aid of this preparation, the pains and evis of indigestion and dyspepsin are removed, just as they would be by a healthy stomach. It is doing wonders for Deyspeptic, curing cases of Debaity, Emack.

Scientific Juice in its Chemical powhers, and furnishing a complete and perfect substitute for it. By the aid of this preparation, the Pepain is the chief element, or great digesting principle of the Gas.

An Artificial Digestive Fluid, analogous to the Gastrie Juice, may be readily prepared from the mucous membrane of the stomach of the Calf, in which various articles of food, as meat and eggs, will be softened changed, and digested, just in the same manner as they would be in the human stomach."

Dr. Combe, in his valuable writings on the "Physiology of Digestion," observes that "a diminution of the due quantity of the Gastric Juice is a prominent and al-prevniling cause of Dyspepsia;" and he states that "a distinguished professor of medicine in London, who was severely afflicted with this complaint, finding everything class to fail, had recourse to the Gastric Juice, obtained from the

tomachs of living anemals, which proved completely successful."

Dr. Graham, author of the famous works on "Vegetable Diet." says: "It is a remarkable fact in physiology, that the stomache of animals, macerated in water, impart to the fluid the property of dissolving various articles of food, and of effecting a kind of artificial ligeston of them in nowise different from the natural digestive property." Dr. Simon's great work, the "Chemistry of Man," (Lee & Blan-

bland, Philadelphia, 1846, pp. 321-21 says: "The discovery of PEP SIN forms a new era in the chemical history of Digastion. From recent experiments, we know that food is dissolved as rapidly in an artificial digastive fluid, prepared from Pepsin, as it is in the natural bastric Juico itself." All modern works on Chemistry, Materia Medica, and Physiolo-

gy, and all good Medical Dictionaries, describe the character and properties of Papers, and state many interesting details respecting The fact that an Artificial Digestive Fluid, or Gustric Juice, persectly resembling the natural fluid, may be readily prepared, does not admit of question. The only wooder is, that it was not before been applied to the cure of Indigestion and Dyspersia - so naturally does such a use suggest itself to the mind.

The Best and Cheapest Family Medicine in the World. DR ROBERTS' COMPOUND SARSAPARILLA PILLS. twenty-five cents per box, containing 50 pills.

Each box contains fifty pills, which makes them as cheap again as any other standard-pill, and four times cheaper, and warranted much superior in the cure of various diseases, to any of the syrup mixtures sold; besides being a more convenient and proper

THE astonishing success which has attended the use of Dr. Roberts' Compound Sarsaparilla Pills is proof abundant and conclusive that they are truly Nature's own Remedies, and that they will cure all curable diseases, quicker and more picasantly than any other medicine over known. The Pills are principally an alany other medicine ever known. The fulls are principally an alterative medicine, (their basis being the solid extract of Sarsaparilla, prepared in a superior manner,) but sufficiently eathartic to gently assist nature, without purging unnecessarily, which make them peculiarly adapted to weak and enfective persons, invigorating and strengthening the body, purifying the system, producing new rich blood and a healthy action of the stomach and liver.

They are acknowledged by our ablest physicians to be unexcepteptionable, but efficacious in the highest degree, and as a general family well the production of the stomach as a general family well the production of the stomach and liver.

THE GREAT KENTUCKY REMEDY. DR. JOHN BULL'S SARSAPARILLA!! Will Wonders never Cease?

Fig. following cures, performed alone by the use of BULL'S SARSAPARHLA, are not wonders, then we neknowledge that we do not know the meaning of the word. Road, and be convinced that facts are stranger than

LINE P. O., Fulton Co., Ky., Oct. 1, 1861. Dr. John Bull: Dear Sir.—The two dozen of your Sarse-

parills, ordered in September, came to hand, and, in ac-lanceledging the receipt of the same, I feel I would be deing you injustice to withhold the following, among the many of the instances that have come under my observation, during the but two years, of the great curative proporthes of your Sarsaparlils:

Mrs. Jeannette Martin, a highly respectable lady of my
resignborhood, aged sixty-five years, had been long afflicted
with a cancerous ulcer, which finally reduced her to so helplets a condition, that she could not leave her bad. She tried the best medical savice in our county, without reiler and had given up all hopes of a cure. At this stage of her and had given up all hopes of a cure. At this stage of her tree, I persuaded her son to take a bottle of your Sersaparilla. He did so, and in a short time returned, and purshased another bottle, stating the first had had a decidedly good effect. She continued to use it until, after the use of five or six bottles, I had the pleasure of seeing the old lady herself at church. She assured me that she had almost antirely recovered her health, and from her I received the account of her disease, and in about the same words I give it to yo This is but one of a number of cures under my

chervation—of very remarkable ones—performed by the
nase of your Sarsaparlila, in my neighborhood. The demand for it has stendily increased since its introduction
is—c. Very respectfully, your obedient servant,
WM. R. DICKINSON, P. M. Boyla County, Ky., Oct. 6, 1851.

Dr. John Bull: Dear Sir—I have seen the most marvellous cure of one of my patients, by your valuable medicine—an old lady, who had been afflicted from her childhood with scrofula, and various diseases of the brain. She was sixty years old. It had run into something like leprosy, and she was the most frightful creature my eyes ever beheld. I called in Dr. McFadden, a very fine physician, to consult with me in relation to her. We came to the to consult with me in relation to her. We came to the conclusion that it was out of our power to relieve her; but, on going to my office, I accidentally picked up one of your Journals, when, on seeing the wonderful cures your Satsaparills had effected, I resolved to try the experiment in this case. I took her two bottles of it, after taking which I perceived a great change. I took her some more. She is now taking the sixth bottle, and I consider her entirely cured. I take great pleasure in recommending your Sar saparilla to the afflicted public.

Yours respectfully, JOHN M. ROSS, M. D.

I. Thomas A. Ringo of Graves Co., Ky., for the benefit I, Thomas A. Ringo of Graves Co., Ky., for the beneat of mankind generally, do hereby certify, that on or about the 16th day of October, 1847, I was attacked with a very severe pain in the lower part of the abdomen, which lasted but a few minutes, and moved into the left hip, and out three deceedingly painful for about five days, during which time I had a very light fever. At the end of that time the fever ceased, and the pain abated for a day or two, after which it again returned, and was much worse than before. During all this time I was under medical treat-From a short time siter I was to to walk or sit up; the hip in which the pain was so bad commenced rising, until some time in January, when it burst, and a number of pieces of bone came out on twenty, at least. Some of the pieces were three-fourths of an inch long. Some time after this, a hard knot appeared on my right hip, also one on my right wrist, and one on my leg, below my knee. I continued to get went and worse, and pain made its appearance in my right shoulder, and would move in my breast and stomach. At this time all persons gave me up to die. A physician thea told me that, as a last romedy, I had better use Mit. BULL'S FLUID EXTRACT OF SARSAPARIBLA. After the use of the second bottle, the knot on my wrist commenced getting soft. I opened it, and a day or two after a piece of hone came out. My wrist soon got wall, and I continued to gain strength. After I used the third bottle, I could get no more for some four weeks, after which time I succeeded in getting three more bottles. After using the three last bottles, the tnot on my hip became soft; it was opened, and some ca uption ran out together with a small piece of bone, an, the sore soon got well, and the knot entirely disppeared. The sore on my leg also opened, and a piece of bone came out. I continued the use of the Sarsaparilla until I used twelve bottles, and am now-entirely well, and able to do daily labor. It may seem strange to some, but I will here state that, during the summer of 1849, I coughed up three pieces of bone, which can now be seen at the residence of my uncle, Thes. Neal, where I now live, and if any persons doubt this statement

I will be happy to converse with them, if they will call on me. Signed, THOMAS N. RINGO. Signed, State of Kentucky, Graves Co., Sci.

This day personally came before me the undersigned, an acting justice of the peace in and for said county, and made cath in due form of law, that the above statement is true. Subscribed and sworn to, this 15th day of February, 1850.

EDWIN ANDERSON, Can the reader believe, after reading the description of the above numerous cures, that there is still a few human beings, suffering with disease, that refuse to give Bell's Sarsaparilla a trial. It is indeed hard to believe, but nevertheless, it is too true. What kind of testimony would it take to convince the few remaining disbelievers, that Bull's modicine will do more even than it promises? The dictor could produce another and another cure performed by his medicine; but if the cases published above will not con vice the sceptioni, it is useless to produce any more, and indeed, it would cost a fortune to publish the many certification.
